## Some general applications of transits on birth chart

1. When Jupiter in his course if transit is in trikona (meaning in same sign, in 5th sign from it or in 9th sign from it) to the sign and navamsa occupied by the lord of house under consideration, the attainment of the good effects of the house can be expected.
2. When in the course of transit the lord of the Lagna and the 6th house gets into conjunction, the person will overcome his enemies, if the lord of the 6th house is weaker than the lord of the lagna. If the lord of the 6th house is stronger than the lagna lord then the results are going to be opposite in effect.
3. The success of the house under consideration can be predicted when the lord of the lagna gets into conjunction with the lord of that house house in course of their transits - provided that the lord of the house concerned is strong, or else the results can differ.
4. Success of a house can be predicted under following circumstances of transits:
  - a. When the lord of the lagna in transit is in trikona sign or navamsa occupied by the lord of the house.
  - b. When the lord of the lagna passes through that house in transit.
  - c. When the lord of the house transits in the sign which is trikona to the sign or navamsa occupied by the lord of the lagna.
  - d. When in the course of transit the lord of the lagna and lord of the house get conjoined or aspect each other.

e. When the karaka of the house in course of his transit gets conjoined with the lord of the lagna or the lord of the sign occupies by moon.

The effects of a transiting planet that have been delineated by the Ancient Sages on the basis of Moon sign would be experienced in different ways even by person born under the same Moon sign or the same Nakshatra and this difference arises because of the difference in the Lagna (rising sign) and the position of planets from the lagna.
